## New PDLCONF & EDL Configuration Software

Pacific Crest Customer Support announces the release of PDLCONF 2.40 & EDL Configuration Software 1.20. This Technical Bulletin provides information on the newest configuration software revisions which are now available for download.

### Features/Enhancements:

- \* Support for 220 MHz PDL and EDL radio modems
- \* Support for OEM "daisy-chain" firmware loading
- \* Fixed channel memory bug
- \* Updated help system

### Upgrade Instructions for Customers

Upgrading your PDL & EDL radios with the latest firmware is straightforward. The following is a brief explanation on how to perform this upgrade:

1.  Open a web browser to <http://www.paccrst.com/download/upgrade.htm>
2.  Download a file: Either PDLCONF or EDLCONF
2.  Save the selected file to your computer
3.  Open the file after it has completed downloading
4.  Follow the prompts
5.  Open the program on your desktop
